

Bail You Out

[Tim Chaisson](#)

You're high now, but wait till you come back down
You want me to take you in, when you are a mess again
You've been hiding out with the vampires downtown
The night is a whirlwind but when the dawn's breaking
I know you better than you know yourself
You know me every time you need my help
I'm gonna bail you out
You've gone astray, you're in a manic haze
Out on a lost weekend with your fair-weather friends
I know you and come Sunday morning you'll be calling
You know me every time you need my help
I'm gonna bail you out
I just want you to know
I just thought you should know
I'm not sitting back and watching while you let yourself go
I'm on your side but I can't watch you die
My patience is wearing thin so you're on your own my friend
I know you and I know I'm part of the problem
You know me everytime you need my help
I'm gonna bail you out
