

# I Will

## Jenny Jordan Frogley

Who knows how long I've loved you?

    You know I love you still

    Will I wait a lonely lifetime?

    If you want me to, I will

    For if I ever saw you

    I didn't catch your name

    But it never really mattered

    I will always feel the same

    Love you forever and forever

    Love you with all my heart

    Love you whenever we're together

    Love you when we're apart

    And when at last I find you

    Your song will fill the air

    Sing it loud so I can hear you

    Make it easy to be near you

And the things you do endear you to me

    Oh, you know I will, I will

    Love you forever and forever

    Love you with all my heart

    Love you whenever we're together

    Love you when we're apart

    And when at last I find you

    Your song will fill the air

    Sing it loud so I can hear you

    Make it easy to be near you

And the things you do endear you to me

    Oh, you know I will
