Defrocked

Harvey Danger

Away from order, but mind the border
I can't bear another perfect sunrise
A wretch like me, before sleeping
Give me haze displays for days and days on end
We'll find direction, exit place
Insert a fractured space of
A bird or something else with wings
To make the guests unsettled when you say
"Try to be true to what teachers taught you."
A solitary music for the lonely
I know my place is in between my graces left unseen

Clouds blocking the light, that's alright
Thugs stole my shadow and left me
Defrocked, defrocked, blocked, sent before my time
Clouds blocking the light, that's alright
Thugs stole my shadow
It's the global block rising--a chemical flaw
An infiltration, congratulations
The domination, congratulations
The saturation, the temporary fascination
Everything turns away
