

# You Make It Easy

## Air

Never been here, how about you?  
You smile at my answer  
Given me the chance  
To be held and understood You leave me laughing without crying  
There's no use denying  
For many times I've tried  
Love has never felt as good Downtown or way up in the air  
When your heart's pounding  
You know that I'm aware You make it easy to watch the world with love  
You make it easy to let the past be done  
You make it easy How'd you do it, how'd you find me?  
How did I find you ?  
How can this be true  
To be held and understood? Keep it coming, no one's running  
The lesson I'm learning  
Blessings are deserved  
By the trust that always could Downtown or way up in the air  
When your heart's pounding  
You know that I'm aware You make it easy to watch the world with love  
You make it easy to let the past be done  
You make it easy You make it easy to watch the world with love  
You make it easy to let the past be done  
You make it easy  
So watch me fall in love
