

The Background

[Andrew W.K.](#)

Do you want to wait around in the back?
Do you want to wait around in the background?
If you want to wait around in the back
Then I can't understand you, I can't You want to wait around in the back?
Are you saying that you want to wait around in the background?
If you really want to wait in the background
I can't understand you, I can't understand you, I can't The end is in sight
But, oh, you're waiting for something
Ultra violet light
And, ooh, I'm waiting for you Do you want to wait around in the back?
Do you want to wait around in the background?
If you want to wait around in the back
Then I can't understand you, I can't You want to wait around in the back?
You're really saying that you want to wait around in the background?
If you really want to wait around in the back
Then I can't understand you, oh The end is in sight
But, ohh, you're waiting for something
Ultra violet light
And, ooh, I'm waiting for you The end is in sight
But, ohh, you're waiting for something
The end is in sight
And, ooh, I'm waiting for you
