

# Down [Praga Khan Jungle Remix]

## Gravity Kills

I'm your fear, I'm your monster  
What's hiding in your shadow? Is it taking what's left of you  
Now take me, now lead me from you  
Now take me from the light that's dying in your eye I'm finding out what's left of you, you're burning out  
What's left of you? Choking on doubt, you're choking  
Way down, way down now what's left of you  
What's left of you, what's left of? See no fear, speak no evil  
Are you screaming out to no one as you fall down a mountain of pride  
I feel you, my eyes wide open  
I feel you, do you think you can save yourself in time I'm finding out what's left of you, you're burning out  
What's left of you? Choking on doubt, you're choking  
Way down, way down now what's left of you  
What's left of you, what's left of? What you see, what tears into you  
Behind the wheel that leads you, are you facing a truth that won't die  
Now take me, now lead me from you  
Now take me from the light that's dying in your eye I'm finding out what's left of you, I'm finding out what's  
left of you  
You're burning out what's left of you, you're king of doubt, you're choking  
Way down, way down now, what's left of you  
What's left of you What's left of you, you're burning out, what's left of you  
Choking on doubt, you're choking  
Way down, way down now, what's left of you  
What's left of you, what's left of?
