

# Nicotine And Alcohol Saved My Life

## Deaf Havana

Dear brother  
I have never asked this much of you  
Could you please just take my other  
Show them how much I care

Hiding under the blanket  
Behing the chair  
There's something that screams  
This seems so unfair

But we're all gonna feel better tomorrow  
It's a feeling you can not only borrow  
Just take a deep breath  
Take in the air of a lifelong nightmare

(We'll just learn to forget about this)  
I would never last a day without you  
(We'll just learn to forget about this)  
But I'd do anything to take it back

We'll just have to learn to forget about this

I'm not changing my mind with the seasons  
'Cause winter has broken  
And I'll be the first one  
To lose my head

Tie me to a broken eyelid itched with razors  
My dear brother is bound up in cages and rages  
Nothing will ever get worse than this right now  
Because a deep breath is out of reach somehow

We'll just have to learn to forget about this

I'm not changing my mind with the seasons  
'Cause winter has broken  
And I'll be the first one  
To lose my head

'Cause I've never had a single cigarette that I didn't enjoy

And all these dreams leave such a better taste, such a better taste on my tongue  
Despite the smell of an old aged man, I'm young at heart  
If I was to have just one more day  
I'd make sure that I spent it without you
