Evolve:

The Chariot

Stay calm,
This generation is a nervous one and they kill all they fear,
But they fear it all,
So they take the bait,
So disappear with me
For the captain has fell asleep hours ago
And they curse his name
Because he fell asleep in the halls of the famed.
Wasting time (as our hands move across the earth with such finesse)
is all I fear but she gives me rest,
Stay with me or stay afraid
This is the plague we have always begged to see find death,
Violence by default is the stage we play,
Stay with me, stay calm,
For the body is not what we lack.
