

# Something Better Change

## Seabird

We were in love  
What does that mean?  
If you walk out, that really changes things

When you came home  
from last night's binge  
You could not find the words to say just what you did

Can we revive  
a love expired,  
beneath the smoke. Can we escape a home on fire?

Something better change soon  
'cause baby I can see the light in you  
is burning out  
Let's slow it down for you  
Baby I can slow it down for you

We were alive  
What does that mean?  
If I change my mind, that really changes things

But I made a choice  
Forgotten then  
to love you alone until I take my final breath

And I will not run  
Or leave your side  
'til you believe my love for you will never die

Something better change soon  
'cause baby I can see the light in you  
is burning out  
Let's slow it down for you  
Baby I can slow it down for you

Something better change soon  
'cause baby I can see the light in you  
is burning out  
Let's slow it down for you

slow it down for you  
Baby I can slow it down for you...
