Brain Freeze

Spectrals

The cinema is still the best we can come up with,
I don't remember what this was like with other girls,
Buy our brain freeze at the door,
Blue tongues do all the work,Just as long as we're cool,
I don't want this to wear off,
My square eyes are for you,
And my tongue is blue,I can't wait for the sequel,
I'm not talking about the film
I don't remember what it was about,
I only had eyes for you,Just as long as we're cool,
I don't want this to wear off,
My square eyes are for you,
And my tongue is blue,How do they expect me to sleep after this?
With my brain freeze."If I Think About The Magic Will It Go Away?"Is it weird if I'd rather be sad?
Sweet nothings are still nothings we just do what we can,
Perfect always did get on my nerves,
And love isn't love unless it hurts,Heart on your doorstep,
Two streets over,
Guitars and girls ran me over,
If I think about the magic will it go away?
Or if I stop thinking about love will it do the same?
