

Get Around This

Safetysuit

You and I, we had it all, I wonder why I let it fall, I don't why know I made this hard for you
And if I go, get it back, apologize for all I lack, would you be there to take this on? would you do anything
at all?

Chorus:

Take me back to yesterday, I swear it on your life, I'll stay on the short side, I'll stay on the short side
Take me back to yesterday, if you can forgive me, I will stay by you only, won't leave, but if you can forget
We can get around this, get around this, get around this, get around, we can get around this, get around this mess
Now you can go and you can leave, I wouldn't blame you for a thing, I acted like I never should
But I will stay and I will bleed, stand in the rain, I'm begging please, because I will be here for you, yeah I will
be here for you

Chorus:

Take me back to yesterday, I swear it on your life, I'll stay on the short side, I'll stay on the short side
Take me back to yesterday, if you can forgive me, I will stay by you only, won't leave, but if you can forget
We can get around this, get around this, get around this, get around, we can get around this, get around this mess
So hold on, baby don't you leave me, please just hold on to me

Chorus:

Take me back to yesterday, I swear it on your life, I'll stay on the short side, I'll stay on the short side
Take me back to yesterday, if you can forgive me, I will stay by you only, won't leave, but if you can forget
We can get around this, get around this, get around this, get around, we can get around this, get around this mess
We can get around this, get around this, get around this, get around this mess
