

West

Mirza

Come out West and see
 Best that could be
 And all you want stay permanently
Come out West and seeNow climb up on a rock
 And stretch out in the sun
 And close my eyes and let
 Imagination runAnd tracing your initials
 In the shining sand
 I'm counting out the days
Till I see you againWho knows what the future holds
 Or where the corns may fall
 But if you don't come out West and see
 You'll never know at allI look off in the distance
 Blow a kiss away
 A thousand miles between us
 Disappears from thereI watch as all the starlings
 Flying from the north
 The beating of their wings
There goes the beating of my heartI sleep out in the desert
 Under the stars above
 And keep making an effort
To wonder in your loveWho knows what the future holds
 Or where the corns may fall
 But if you don't come out West and see
 You'll never know at allCome out West and see
 The best that it could be
 And all you want stay permanently
 Come out West and see
