

# Summer Skin

Amy Cook

Squeaky swings and tall grass  
The longest shadows ever cast  
The water's warm and children swim  
And we frolicked about in our summer skin  
I don't recall a single care  
Just greenery and humid air  
Then Labor Day came and went  
And we shed what was left of our summer skin  
On the night you left I came over  
And we peel the freckles from our shoulders  
Our brand new coats so flushed in pink  
And I knew your heart I couldn't win  
'Cause the seasons change was a conduit  
And we left our love in our summer skin
