

# Thin Air (feat. Jordan Fisher)

Olivia Holt

People keep stopping me  
People, they're noticing something is different  
Everything's different 'bout me I was just minding my business  
When I saw the light something is different  
Everything's different this time Don't stop taking all of my time, make it all yours  
Keep on, 'cause my heart likes the rush so please give me more Boy, this is crazy 'cause you came out of thin air  
You must be magic what you're doing it ain't there  
Oh, oh  
You got that perfect time and baby I swear  
Our chemistry is glowing, made the whole world stare  
Oh, oh Boy, you came out of thin air, thin air, thin air  
Like you always been there, been there, been there  
Before you I didn't care, didn't care, didn't care  
Came out of thin air, you came out of thin air I won't fool with your love  
I won't ever give you up  
Pull me in closer  
Not scared to admit I want your touch Your voice is a symphony  
Singing sweet melodies  
Pull me in closer  
'Cause when my world's over you got me Don't stop taking all of my time, make it all yours  
Keep on, 'cause my heart likes the rush so please give me more Boy, this is crazy 'cause you came out of thin air  
You must be magic what you're doing it ain't there  
Oh, oh  
You got that perfect time and baby I swear  
Our chemistry is glowing, made the whole world stare  
Oh, oh Boy, you came out of thin air, thin air, thin air  
Like you always been there, been there, been there  
Before you I didn't care, didn't care, didn't care  
Came out of thin air, you came out of thin air [Jordan Fisher:]  
Oh  
Like you checking on me  
Yeah, I've been watching, too  
It's like a Justin Bieber "Baby"  
It's because of you  
You never knew I felt this too  
But now we're here, with nowhere left to hide  
The way you're looking at me, it's how I look at you  
Don't need space in between, just cut the tension right through  
Real soon, we can fly to thin air to check the view, yeah Boy, this is crazy 'cause you came out of thin air

You must be magic what you're doing it ain't there

Oh, oh

You got that perfect time and baby I swear

Our chemistry is glowing, made the whole world stare

Oh, oh Boy, you came out of thin air, thin air, thin air

Like you always been there, been there, been there

Before you I didn't care, didn't care, didn't care

Came out of thin air, you came out of thin air
