Just Right

Soul II Soul

Oh yeah, all rightAre you first teaching that to me
Then I hope that you can see
Time is not a shadowIf you could stand the test of time
Then I hope that you can find
The truth that you've been searching forMake everything just right
Make everything just right
Make everything just right
Make everything just rightThere will always be a fountain
As big as a mountain
Where the flow of love will glowJust to catch you on this pleasure
As much as you can measure
Will take some time to knowMake everything just right
Make everything alright
Make everything just rightMake everything just right
Make everything alright
Make everything just rightMake everything just right
Make everything alright
Make everything just rightMake everything just right
Make everything alright
Make everything just rightWell, the viable life in which we thrive
And got to fish, is our favorite dish
Which we rely on to be strong just to carry on
Doing what we do best all day longWell, best I guess just to keep rinking check
And make sure that you watch every step that you take
Well, to make everything alright
Well, like a peaceful world in the sunlight
We're gonna make it thriveMake everything just right
Make everything alright
Yeah, make everything just right
Make everything alrightJust make everything just right
Make everything alright
Yeah, make everything just right
Make everything just right
