

New Babies; New Toys

Orchestral Manoeuvres In the Dark

There's no victims only volunteers
Been the same throughout the years
Step right up and cry your tears
Face to face with all the fears They don't want you they don't need you
They just use you they just bleed you
They don't want you they don't need you
They just use you they just bleed you New babies and new toys
It's better with the girls but it's bigger with the boys
Sold a dream but you got no joy
It's better with the girls but it's bigger with the boys There's no heaven there's no hell
Cream will float but shit will sell
Step aside avoid the smell I surrender, ring the bell They don't want you, they don't need you
They just use you, they just bleed you
They don't want you
They just bleed you New babies and new toys
It's better with the girls but it's bigger with the boys
Sold a dream but you got no joy
It's better with the girls but it's bigger with the boys Bigger with the boys, bigger with the boys
