Already Love

Great Good Fine Ok

Just forget it
I can make it mind over matter
I can make you feel something better
I don't want to be apart
And I said it, everything in life has a meaning
Think of all the things we were spending
Hoping for a way to startI came to live it right,
I hope to stay the night,
You back away, but it's already love
I know you think that I'm crazy
'Cause I can't stop calling my baby
And I know that you'll never break me
'Cause it's already love
'Cause it's already loveI'm a soldier, lied you but I know that I need it
Try to look away but I see it
Yeah, your body feels like home
Is it over? We don't have to wait on forever
We can go the wrong way together
I just wanna let you knowI came to live it right,
I hope to stay the night,
You back away, but it's already love
I know you think that I'm crazy
'Cause I can't stop calling my baby
And I know that you'll never break me
'Cause it's already love
'Cause it's already loveYou know that love that you give me
It got me up and saved me
And I know you hear what I'm saying
'Cause it's already love
'Cause it's already loveFeel it, calling you back
Hoping for a letter
Waiting for somebody to come
Show you what to look for
Nothing can escape my blood
Everything I got it's everything I wanted
Now I wanna tell you who
Now I wanna tell you whoI know you think that I'm crazy
'Cause I can't stop calling my baby
And I know that you'll never break me

'Cause it's already love
'Cause it's already love
You know that love that you give me
It got me up and saved me
And I know you hear what I'm saying
'Cause it's already love
'Cause it's already love
