

A Million Years

Teddy Geiger

Caught up in what's in
Caught up in the things that everyone wants
Caught up in what's out
Caught up in the things that you could do without
What if I was one of them, so I will say
If I lived for a million
years
I would be right there to catch your tears
Will you get over it this time
Or is this the last time
On this night we breathe air
What makes it so different? What makes you not care?
I wish that we could be the same
And I wish that you could give up this game
Don't want to be one of them and so I will say
If I live for a million
years
I would be right there to catch your tears
Will you get over it this time
If this is the last time, then
Will you say goodbye before you leave
Will you say goodnight, just one more time please
Will you call my phone out of regret
And will you love again, with other than me, other than me
Will you speak of me, will you remember me
(And will you remember me)
Will you remember me
(And will you remember me)
Will you remember me
If I live for a million years
I would be right there to catch your tears
Will you get over it this time
Or is this the last time, yeah
(Is this the last time)
Oh, is this the last time
Well, is this the last time
Is this the last time my dear
Oh, is this the last time
Well, is this the last time, yeah
Is this the last time
