

# Butterfly

## ZOX

I tried little butterfly not to hurt you  
So i guess that this might come as some surprise  
I'm gonna take this trian even though i never thought i'd desert you  
I've got a ticket and i'm just biding my timeI don't really want to work it out  
And i can only wonder what you're all aboutI tired little butterfly to protect you  
It was asking for disaster but i guess that's just the way it goes  
If it's anything know that i will never forget you  
Today it hurts but tommorow it won't even knowI don't really want to work it out  
Because i can only wonder what you're all about  
We talk and talk it's all my fault and still i know it's true  
That i don't know much but i know i don't need you  
And everything's a little better without you
