What How When Where (why Who)

Ani Difranco

What what what, what what what
What what what, what what what
What what what, what what what
What what what, what what what
What, what, what, what, what did you think you were doing?
How and how did you think this would go?
When, when, when, when, when you showed up on my radar
Where did you think you would show?
What, what, what, what, what do you make of this station
How and how it pulls away from the train?
When, when, when if at all will you realize
Where do and done are the same?
What, what, what, what, what now you're out in the open
How and how do you think you can hide?
When, when, when will you find some nice soft sand
Where you can bury your pride?
What, what, what, what, what do you want from this lifetime?
How and how does your story line flow?
When, when, when you wanna get to the punch line
Where will the applause sign go?
And why, why, why, why, why, why don't you just take your bow
'Cause who's gonna love you now?
What, what, what did you think you were doing?
How and how did you think this would go?
When, when, when you showed up on my radar
Where did you think you would show?
What, what, what, what, what do you make of this station
How and how it pulls away from the train?
When, when, when if at all will you realize
Where do and done are the same?
What, what, what, what, what now you're out in the open
How and how do you think you can hide?
When, when, when will you find some nice soft sand
Where you can bury your pride?
What, what, what, what, what do you want from this lifetime?
How does your story line flow?
When, when, when will you get to the punch line
Where will the applause sign go?
And why, why, why, why, why, why don't you just take your bow

'Cause who's gonna love you now?
