

Eastern Glow (Album)

The Album Leaf

One by one
We force ourselves
Turn it on
It comes in waves Try to find
Maybe this time
Don't turn your head
it's easy to forget how we were Once inside
We've made it here
We struggle with the lights
They never go away What have we learned
It's the same old things
That drive us here
And never go away
We are changed Through the tides
Make your way
You'll find the time
A comfort inside Here I wait
In the safe place
Where we were so many years ago
So many years ago One by one
We close our eyes
And return to that place
As a thousand nights go by One by one
We close our eyes
And return to that place
And a thousand nights went by
