

# Like a Lie

## Copeland

Every peak and canyon we course over  
We donâ€™t even have to try  
You can see my famine through your old  
And.. my wealth and never tries  
Here with my sweet companion  
Every night I lay Iâ€™m able to close my eyes

And in a flash we are on the shore  
And everything we love is here  
There were songs inside your words  
Every one that I adore

How could I ever love you more?  
How could I ever keep you here?  
I can only make this worse  
I can only grasp for more

Feels like a lie when I hold you  
Feels like a lie but it comes true  
And you know I was lost when I found you  
Though it feels like a lie when I hold you

Everyone was watching as we held each other drifting out to sea  
Left the care is crowding before we drown there, awaken suddenly

How could I ever love you more?  
How could I ever keep you here?  
I can only make this worse  
I can only grasp for more

And in a flash we are on the shore  
And everything we love is here  
There were songs inside your words  
Every one that I adore

Feels like a lie when I hold you  
Feels like a lie but it comes true  
And you know I was lost when I found you  
Though it feels like a lie when I hold you
