Mark My Words

The Coronas

Are we running round in circles?
Begin to wonder what it's all about
Moving back and forth for too long
Don't think we ever really figured it out

But you always sound so certain
Telling such colourful lies
Once again Yeah I think that's great
But will anybody be here tonight

Mark my words you'll know his name
And if you don't act now, you'll have yourselves to blame
From all that lies beside, he'll try to make them see
It's not like he didn't know before
And the love she gives just makes him want it more
I can feel it close, I can feel it close, I can feel it close to me
Feel it close to me

And as we waits disillusioned
Remember how he used to dream of her
And feels her head move toward his chest
He says his voice can still be heard

Mark my words you'll know his name
And if you don't act now, you'll have yourselves to blame
From all that lies beside, he'll try to make them see
It's not like he didn't know before
And the love she gives just makes him want it more
I can feel it close, I can feel it close, I can feel it close to me
Feel it close to me

Ah...

Mark my words you'll know his name
And if you don't act now, you'll have yourselves to blame
I can feel it close, I can feel it close, I can feel it close to me
