Massive Glacial Wall

Day Six

A cold wind, is trying to reach us
Thousands of reasons
To go on our own way
Thin ice in April will teach us
Neglecting the problems
Won't save the next dayInvestigation of a glacial massive wall
Prove this global changing
that we've never hoped forFuture days reflected (being careless)
how we ruled the world (treading shameless)
Mind and brains affected (aching hopeless)
In the end it comes to youSpringtime, why are you falling?
What happened to your control, what happened to our fall?
I realise you should know it's not your time
We won't be taking blame and we won't feel the shameTry to measure, calculate
Mathematics, the inner state
But I'm drawn to this; an inviting call
Is this the answer to all?End of the lies, they're blown away
We broke the ice on a perfect day
All secrets say, there's gravity underground
Now they're coming out again"Inside" is holding the secrets
Reveals everything
And will divideTry to measure, calculate
Mathematics, the inner state
But I'm drawn to this, an inviting call
Is this the answer to all?End of the lies, they're blown away
We broke the ice on a perfect day
All secrets say, there's gravity underground
Still they're coming out again
End of the lies, they're blown away (Turning down, brush aside)
We broke the ice on a perfect day (Come to sense, when your feeling's wrong)
All secrets say, there's gravity underground (Turning down, brush aside)
Still they're coming out again
