Good Love

Tlc

Every time I get to see you I get this feelin' It's so fuzzy inside And as soon as I walk away from you I'm still tasting your kiss Saving it in my mind It's not everyday I find A guy that makes me smile all the time Not the way that you do The guys I thought I used to love Compared to you they don't match up They got nothing on you I think I found a good, good, good love The kind that worded on you The kind that you wanna hold on to I think I found a good, good, good love We can be lovers and friends too And they'll do anything for you A good love Baby you got somethin' special That has me thinkin' Of settling down You're the one my Mama told me Would sooner or later one day Finally come around I think I found a good, good, good love The kind that will put it on you The kind that you wanna hold onto I think I found a good, good, good love We can be lovers and friends too And they'll do anything for you Good love I think I found a good, good, good love The kind that will put it on you The kind that you wanna hold onto I think I found a good, good, good love We can be lovers and friends too And they'll do anything for you

Good love

You bring me joy and you bring me much pleasure
I could never see myself leaving you ever
Your soft touch is good and it can't get no better
You have got my mind so caught up
I'm drunk off of your good love, oh yeah
The kind that will put it on you
The kind that you wanna hold onto
I think I found a good, good, good love
We can be lovers and friends too
And they'll do anything for you
A good love

I think I found a good, good, good love
The kind that will put it on you
The kind that you wanna hold onto
I think I found a good, good, good love
We can be lovers and friends too
And they'll do anything for you

Good love Good, good love On you

The kind that you wanna hold onto
I think I found a good, good, good love
We can be lovers and friends too
And they'll do anything for you
Good love

I think I found a good, good, good love
The kind that will put it on you
The kind that you wanna hold onto
I think I found a good, good, good love
We can be lovers and friends too
And they'll do anything for you
Good love

I think I found a good, good, good love
The kind that will put it on you
The kind that you wanna hold onto
I think I found a good, good, good love
