

# Stone and Rock

## The Casket Girls

you will be the free one  
and i will be left behind  
there is an answer  
that i can never find our love is not like water  
it's made of stone and rock  
the waves will crash and alter  
turn to sand in the dark  
put your right hand up to heaven  
in case there is a god  
and let the waves wash over  
our hearts of stone and rock thrown into the fire  
left out in the cold  
living makes you tired  
our hands were meant to hold  
it happens just like that  
you can't sit down where you sat  
you can look back but the fire's smoke and ashes  
and the thing that was before  
changes lock and key and door  
in the face of what you've lost and what has lasted
