

Cold Conscience

Alvarez Kings

Is your conscience cold
Clever little acronyms cut light against your throat
Never one to ever pray for hope
To disappear in a puff of smoke
Are your intensions clear
Drowning with the pending fear
To wipe away those tears
Never one to ever pray for hope
To disappear in a puff of smoke
Life is suffocating it's true
In time will bring me back to you
Just see yourself where you go I go too
You'll see yourself where you go I go too
Just see yourself where you go I go too
Is your reflection clear
Constant reminders that I can't hear
The truth is what you feel
But you're never one to ever pray for hope
So you disappear in a puff of smoke
I won't push too far
I will go where you go too
Don't take it too heart
I will go where you go too
Life is suffocating it's true
In time will bring me back to you
But you don't love life lately
You don't love life lately
Give up, give in or give all you've got
But you don't love life lately
You don't love life lately
Give up, give in or give all you've got
Just see yourself
Just see yourself
Just see yourself where you go I go too
You'll see yourself where you go I go too
Just see yourself where you go I go too
You don't love life lately
You don't love life lately
Give up, give in or give all you've got
You don't love life lately
You don't love life lately
Give up, give in or give all you've got
