Make It Happen

Hear'say

Yeah
Like a supersonic boom coming at ya
One thing on my mind
Everybody's out to get something
Ain't no compromise
You know that I am gonna wait
I'm gonna take my time, I'm gonna take my time
There no need to anticipate
I'm gonna make you mine, make you mine
A total transformation
Eyes move into dilation
No need for complication
So take a look inside
Give it up, step on up we have got
The right stuff let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on out I know
Where you know how let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Movin' though the crowd I can feel you
Need you by my side
Feel your body move through night into morning
Just enjoy the ride
You know that I am gonna wait
I'm gonna take my time, I'm gonna take my time
There no need to anticipate
I'm gonna make you mine, make you mine
A total transformation
Eyes move into dilation
No need for complication
So take a look inside
Give it up, step on up we have got
The right stuff let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on out I know
Where you know how let's make it happen

Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on up we have got
The right stuff let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on out I know
Where you know how let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Let's make it happen
Sing it to me let's make it happen
Give it up, let's make it happen
Give it up, let's make it happen
Give it up, step on up we have got
The right stuff let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on out I know
Where you know how let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on up we have got
The right stuff let's make it happen
Shake your rhythm now feel the notion
Shake your rhythm you're the motion
Give it up, step on out I know
Where you know how let's make it happen
