

# How We Operate

## Gomez

Calm down and get straight  
It's in our eyes, it's how we operate  
You're true, you are  
I'd apologize but it won't go very far  
Please, come here  
Come right on over  
And when we collide  
We'll see what gets left over  
A little joy, a little sorrow  
And a little pride  
So we won't have to borrow  
Wherever you lead, I'll follow  
Turn me inside out and upside down  
And try to see things my way  
Turn a new page, tear the old one out  
I'll try to see things your way  
Please, come here  
Please, come on over  
There is no line  
That you can't step right over  
Without you, well, I'm left hollow  
So can we decide to try a little joy tomorrow?  
'Cos baby, tonight I'll follow  
Turn me inside out and upside down  
And try to see things my way  
Turn a new page, tear the old one out  
And I'll try to see things your way  
The way that we've been speaking now  
I swear that we'd be friends, I swear  
'Cos all these little deals go down with  
Little consequences, we share, we share  
Turn me inside out and upside down  
And try to see things my ways  
Turn a new page, tear the old one out  
And I'll try to see things your way  
And I'm gonna love you anyway  
I'll try to see things your way  
I'll try to see things your way  
I'll try to see things your way  
I'll try to see things your way
