

# Black Dice

## Monguito Santamaria

Feel me now My forefinger flippin pentagrams  
Left hand catch them pix by them peak facin south  
Pinhole pic of my wingspan jail breakin doubt  
Highest vibration ninth ring of fire crowned  
War cry feel my call hear my chamber revolve  
In your brain like the halls of Amenti  
Treat a bitch like a whore  
Leave your pink sock at the door  
Saturn level flexed  
Like these fractals I coalesce  
I'm not takin this shit anymore  
One way in come again one way in no way out  
Cheek in tongue when in doubt feel me now  
Violators feedem vapors don't do me no favors Feel me now Drop top changaa flow go boom boom off my  
rockers  
Rollin doom bumbata choppers  
See me through spot light cherry  
Fog like Nunhead no teeth mary  
Don't carry on  
Don't where are we how far along  
Me care not dare not key my brom  
My life on a limb about to break  
I'm a tower pon tectonic plate Feel me now Why you think I'm havin everything you're rimmin ass for askem  
Whose ass they're rimmin when I'm flaggin  
Load your cannon shutter flash heavy damage  
Steady hand shit forget me you can't bitch  
Slappin click clack tricks stretch please  
My sleeves plastic can't breath in this atmos  
Fuck atlas my ego palms planets  
Fuck you yeah yeah its that fuck you can't stand slip  
Cut you cause I can dip Feel me now I'm the man who press that button  
Sweaty palm get caught bluffin  
Fold a man into nothin for nothin  
My oxidized gold shaft floods your jugular with lucifer  
I'll shoot it word feel like you swallowed jupiter  
Today your city tomorrow lifting the universe  
One way in one way out  
Cheek in tongue when in doubt  
Feel me now
