

# School Cafeteria - Version 2

## Weird Al Yankovic

Now, let me tell you 'bout the school cafeteria  
It's got all the others beat  
It sells over four million burgers a year  
Just think, that's almost two pounds of meat  
My ice cream sandwich is lukewarm  
But my burrito is much too cold  
You know a school cafeteria is the only place  
That sells artificially colored mold  
You know a school cafeteria believes in mass production  
They buy those lousy soy beans by the keg  
I don't like to complain, but in a school cafeteria  
You can buy a taco and get bubonic plague  
Today in the school cafeteria  
They introduced a brand new malt  
It's called boysenberry dysentery  
Please pass the salt  
The tunafish sandwiches'll make you ill

The enchiladas are enough to kill  
Before you eat, you'd better make out your will  
In the school cafeteria today  
After sixty-three years in the business  
Our cook still hasn't got the knack  
And all the food in the school cafeteria  
Comes from care packages that were sent back  
Feel your arteries growing hard  
As you eat another healthy spoonful of lard  
It's no wonder that the food is so gross  
The health department is afraid to come close  
So everybody better hold your nose  
In the school cafeteria today  
So listen very closely, all you girls and guys  
Here's a little message to the wise  
You'd better not try the chili surprise  
In the school cafeteria today, oh yeah  
In the school cafeteria today
