

Get Real Get Right

Sufjan Stevens

I know you want it
I know you really wanna get it right
Have you forsaken, have you mistaken
Me for someone else? Saturday night you sleep
With a rifle at your side
Delivering speeches
Delivering speeches left and right Follow those created deaths
Fortune save me from his wrath
Spaceship out the house at night
Prophet speak what's on your mind You know you really gotta get right with the Lord
Visit the future, visit the future from the outer space
(Space, space, space, space)
A ring of fire, a ring of fire falling on your face
(Face, face, face, face) You dream of the dark age
You dream of the dark age of your youth
Consider the danger
Consider the danger, as it moves Prophet, father, priest and king
(I know you want it, I know you really wanna)
Snake skinned master at your feet
(I know you want it, I know you really wanna) Barricade the bathroom doors
(I know you want it, I know you really wanna)
Find some things you can't ignore
(I know you want it, I know you really wanna) I know you really gotta get right with the Lord
You know you really gotta get right with the Lord I know I've caused you trouble
I know I've caused you pain
But I must do the right thing
I must do myself a favor and get real Get right with the Lord
I know I've lost my conscious, I know I've lost all shape
But I must do the right thing
I must do myself a favor and get real
Get right with the Lord I know I've always loved you
I know I've always been
But I must do the right thing
I must do myself a favor and get real
Get right with the Lord Get real, get right for you will not be distracted by the signs
Do not be distracted by them
Do your favor and get real
Get right with the Lord Get real, get right for you will not be distracted by the signs
Do not be distracted by them

Do yourself a favor and get real
Get right with the lord
Get real get right with the Lord
