

# Take It How You Want It

## Young Gunz

Late night, by chance encounter  
A whisper and everyone's found out  
She said, he said he saw it with his own two eyes  
Time and place (he called a friend)  
Smile on your face (or she called him)  
He kissed you (she called me too)  
You said you didn't know what to do  
You told me Take it how you want it  
There's no way around these played out scenes  
They don't mean anything  
Take it how you want it  
There's no way around these played out scenes  
They don't mean anything to me  
We'll see One slip should teach you a lesson  
Discretion leads to prevention  
Truth redefines itself as what you choose to believe  
Same story (oh, not again)  
But now it's about me (it's all the same)  
I've told the truth (as if you cared)  
But there's no convincing you  
So I said Take it how you want it  
There's no way around these played out scenes  
They don't mean anything  
Take it how you want it  
There's no way around these played out scenes  
They don't mean anything Take it how you want it  
Take it all away  
There's no use starting over  
It gets worse here everyday  
Back and forth forever  
Don't want anymore of that  
But there's no where to run so I keep coming back Take it how you want it  
There's no way around these played out scenes  
They don't mean anything  
Take it how you want it  
There's no way around these played out scenes  
They don't mean anything Take it how you want it  
There's no way around these played out scenes  
They don't mean anything to me

Take it how you want it  
There's no way around these played out scenes  
They don't mean anything to me
