

Lay Down

O.A.R.

There was time now it's far away
I didn't know you but I knew your name
We would talk, I got nothing to say
But hear me now You're like an angel that is just for me
Bless your heart, let your mind go free
And it's too loud on the Earth today
So let's go home and Lay down, rest here
In my arm now lay down
Lay down, the universe is ours
Lay down, lay down, lay down Catch a teardrop, bleed the heart
Masquerade in a world apart
From a mass that got more
To lose I'm making a run So blessed angel that is just for me
Catch the dream, there's a lot to see
But it's too loud on the Earth today
So let's go home and Lay down and rest here
In my arm now lay down
Lay down, the universe is ours
Lay down, lay down, lay down I never seen a body move the way you do
Rocking steady and you know it too
You had to come down from Heaven above
And tease the world So listen good 'cause I'm telling it straight
I don't got no more time to waste
I got a trip planned past the Sun
Taking you home To lay down and rest here
In my arm now lay down
Lay down, the universe is ours
Lay down, lay down, lay down See, I bought a planet for you
Planned it for you, my dear
There's no one above you
I purchased a room with a view So we could fly away to outer space
We'll be alone just us two
And you know it's all for you
It's all for you, it's all for you
It's all for you, it's all for you, come on Lay down, lay down
Lay down, lay down
Lay down
