

Slow Motion

Holy Ghost!

How do you know what i would say
i havent said it
maybe you do, maybe you don't
better forget it
out of the house, into the car
back to the ocean
do it again in slow motionin slow motion
in slow motion
in slow motion? movie stars theyve all gone out of work
but you still go out at night
i guess youll never learn
and you threw out all your clothes
and started something new
every time you find your place
you always got to move(chorus)and theres something in the world
that you can't live without
but you cant make up your mind when you leave the house
and the doctor said "just take one when ever you feel alone"
and i think youre gonna need it if youre not ever home(chorus)slow motion
slow motion
slow motiondo it again in slow motion
