

# Yellow Birds and Coal Mines

## The Scene Aesthetic

Gather around me  
I need some time to re-collect these thoughts of mine  
Your so kind...  
Stand behind me  
Help me face these fears i've built over the years  
so clear...  
Your always here  
(I wouldnt leave you here like this)  
I'm desperate, oh so desperate to feel alive  
(you need someone to help you, please let me guide you through this)  
You so kind...  
A persistance in my interest  
well, i could have never made it through the night  
(it's alright)  
Cause we saw this coming through  
and i am still here

(chorus)  
Keep me here i believe  
finding faith you must agree  
upon a state of action  
keep me posted, still in action

I keep you here cause i believe  
finding faith is what i need  
to take the chances i must take  
before my heart begins to break

I know you have it hard sometimes  
don't let the bad things rule your life  
sit back and watch your life take flight  
your just so young, you have the time (the time)  
Just leave it alone (x3)

(chorus)

before my heart begins to break...

thanks for being here my friend  
you and me til the very end of time

we're gonna do this one together (x2)

thanks for being here my friend  
we're gonna do this one together  
thanks for being here my friend

keep me here i believe  
finding faith is what i need  
upon a state of action  
keep me posted still in action
