Near You

Leo Addeo

I should get out of this seat
Feel the world beneath my feet
Strive to see more of the sun
Try to change what I've become
Move on up through this down
Take this luck and turn it around
I get near you but I never seem to reach you
I get near you but I never seem to reach you, reach you
Somewhere tonight the stars still shine
Somehow I've got to re align
Fueled by the promise of the sun
Pulled by the charm this night has spun
Move on up through this down
Take this luck and turn it around
I get near you but I never seem to reach you
I get near you but I never seem to reach you, reach you
I get near you but I never seem to reach you
I get near you but I never seem to reach you, reach you
Reach you, reach you, reach you
