

# Please Be the One

[Karla Bonoff](#)

You spend your days and nights alone  
You think it easier that way  
But that cold feeling in your bones  
I said I could take away  
I said, please be the one  
Please be the one  
Please be the one Well, if your world's a lonely place  
It's something you never show  
And love could stare you in the face  
And baby, you'd never know  
I said, please be the one  
Please be the one  
Please be the one All the years, they took their toll on you  
Your innocence has all disappeared  
Tell me why you had to learn your love was  
something to fear Well, someday the tables here will turn  
And I won't want to play  
And for my sweet kiss you will yearn  
When it's too late to say  
Please be the one  
Please be the one REPEAT CHORUS
