

Can't Take It Back

Lucas Carpenter

I see you across the way
Your smirk lets me know
That you're feeling
The same way I do
'Cause I'm about to
burst out laughing too

Countless times I've
Crashed on this couch
Catching up till
The sun comes up
But I've had my doubts
If I was right
Cause every time
We'd just say goodnight

But now we've got
Some decisions to make
Do we cross the line
And never stay the same
Cause we can't take it back

No we can't take it back (x5)

Cause with you and me
There's no in between
You're either gonna be
My bride to be
Or my best friend in the end

History sits in frames on your desk
Graduations, celebrations,
You and your BFF in most
Always repeating
No we're just really close

Well I'd never trade those memories
For a one night stand
Because girls like you
Are far and few

I can count them on one hand
We drove through life
Caught up in our conversation
We missed the signs

But now we've got
Some decisions to make
Because once we cross the line
It'll never be the same
Cause we can't take it back

No we can't take it back (x5)

Cause with you and me
There's no in between
You're either gonna be
My bride to be
Or my best friend in the end

Well maybe we'll go
Dancing down the aisle
In grocery stores
Or church cathedrals
I'm content either way
We can have movie nights on Mondays
And then I'll go

We can hold hands
In the shadow of a steeple
Standing in front of
Hundreds of people
All saying I told you so
Cause we can't take it back

No we can't take it back (x5)

Cause with you and me
There's no in between
Cause we can't take it back
No we can't take it back
No, no we can't take it back
No we can't take it back
No, no we can't take it back
No we can't take it back

Cause with you and me

There's just no in between
And now you're gonna be

 My bride to be

 Yes

You're gonna be my bride to be
And my best friend in the end
