Motorcycle

Kip Moore

I know the lights are out, I know it's getting late
But you're still young and we're wide awake
I've never seen a sky this damn bright
So don't go home, it just ain't right

I got a good idea, I got a wild head
There's a little spot and we could meet you there
Take the only road straight outta town
Until you see the fire, baby don't slow down

'Cause we'll be up all night
Keeping up the moon
I just wanna dance, baby dance with you
We gonna scream and shout until sunrise
We won't close it down
We'll be up all night

Baby, grab some beers and we'll grab guitars
Tell all your friends and we'll ride the stars
We'll gas the fire, try to make it last
And we'll sing it up and you can shake your a**

And we'll be up all night
Keeping up the moon
I just wanna dance, baby dance with you
We gonna scream and shout until sunrise
We won't close it down
We'll be up all night
Alright

We'll be up all night
Gonna feel so free
Only got one ride, don't need no sleep
So baby, dance my way
And I'll pass the wine
Wanna kiss your face
And stay up all night

We'll be up all night
Keeping up the moon

I just wanna dance, baby dance with you
We gonna scream and shout until sunrise
We won't close it down
We'll be up all night

Yeah
Up all night
