

# All Because

[Ari Hest](#)

If I woke in a dream I'd know it  
If I was, if I was still dreaming  
Would I still feel the way I feel right now?  
Slip away - I don't really know how.  
With every heartbeat I can look back  
With every step is a new direction  
Leaving me so where I live again  
All because I love you.  
Maybe we were two rivers flowing  
Taking breath and look at where you're going  
Do you see the end of me  
and the start of you?  
I guess that was the best we could do  
With every heartbeat I can look back  
With every step is a new direction  
Leaving me so where I've never been,  
All because I loved you.  
And the stars will all fall down  
and the moon will slide to the back of my heart  
And the world will spin around  
Making room for the light.  
With every heartbeat I can look back  
With every step is a new direction  
Leaving me so where I've never been  
All because I love you.  
With every heartbeat I can look back  
With every step is a new direction  
Leaving me so where I've never been  
All because, all because I love you.
