

More Than Just a Little

[John Berry](#)

Seems like we've been lovers since the start of time
This kind of do or die don't happen overnight
It would be an understatement to say I'm obsessed
Since I live and breathe for your touch, girl I'm more than just a little
More than just a little in love
I'm more than just a little
More than just a little in love I carved your name on the sycamore in my front yard
I got your picture taped to the dash of my car
You can say that my behavior's adolescent at best
But this ain't no school boy crush, girl I'm more than just a little
More than just a little in love
I'm more than just a little
More than just a little in love More and more, I'm less and less inclined to hold my feeling's back
And I've got love that's in excess of anything your heart could ever ask It would be an understatement to say I'm
obsessed
Since I live and breathe for your touch I'm more than just a little
More than just a little in love
I'm more than just a little
More than just a little in love
I'm more than just a little
More than just a little in love
