

Show Me a Miracle

Klaxons

Let me take you to a place
You may have never been
Let me show you all the things
You say you've never seen
If you're coming, pick it up
Because we should be going now we're flowing
I believe there is no way of knowing
When you're not clear to me
There is no way of knowing
This is an impossible dream
There is no way of knowing
When you're not clear to me
There is no way of knowing
Us to live to the scene Show me a miracle, help me to see
I need a miracle, follow me follow me now
Show me a miracle, give me the key
I know it's possible, follow me follow me now
Follow me follow me now
Follow me follow me now Show me something I could see
This time I can believe and take me to a place
I never wanna leave
Now we're flowing and we've been
To where we should be going
This is something I could see
There is no way of knowing
When you're not clear to me
There is no way of knowing
This is an impossible dream
There is no way of knowing
When you're not clear to me
There is no way of knowing
Us to live to the scene Show me a miracle, help me to see
I need a miracle, follow me follow me now
Show me a miracle, give me the key
I know it's possible, follow me follow me now
Follow me follow me now
Follow me follow me now
