When It's All Burning

Strata

When it's all burning, when it's over
When it's all said and done
Were we ever even alive?
This keeps repeating in my head
We should prepare for the worst
When it's all burning, will we see clearly?
Will we suffer at all?
Oh, it'll be perfect, running scared
This keeps repeating in my head
We should prepare for the worst
The sky is falling, people running scared
This could be better for the world

When it's all said and done
Who will remember you?
When it's all coming down
Who will remember me?
This keeps repeating in my head
We should prepare for the worst
The sky is falling, people running scared
This could be better for the world
This keeps repeating in my head
We should prepare for the worst
