

With Every Hour

The Capsules

So much to tell you
So much has happened, ah
Many things
And maybe you know, in my mind
It happened more than once
In my mind, it happened all the time
You were with me all the time
With every hour
With every day
Only a second
Pulled you away
With every minute
With every day
With every hour
With every day
Never a second
You are away
With every minute
With every day
