Save Us

Feeder

Face against the ground Torn, but you can stand Your will is strong, but you have now I know you can save usFaith is on your side Fears you can't deny It's burned a hole, right through your soul But I know you can save us Save us nowDon't say goodbye I know you can save us Don't wave goodbye But nothing can break us Don't say goodbye I know you can save us You can bring us back againBorn to be as one Turn to face the sun Your will is strong, but you have now I know you can save us Save us nowDon't say goodbye I know you can save us Don't wave goodbye But nothing can break us Don't say goodbye I know you can save us You can bring us back again You can bring us back againFace against the ground Torn, but you can stand Your will is strong, but you have now I know you can save usDon't say goodbye I know you can save us Don't wave goodbye But nothing can break us Don't say goodbye I know you can save us You can bring us back againDon't say goodbye I know you can save us Don't wave goodbye But nothing can break us Don't say goodbye

I know you can save us

You can bring us back again You can bring us back again
