Lonely Night

Tribal Seeds

Lonely night
Your love shall always remain close to you
But when you feast your eyes up in the sky
Let them be blessed by the stars and Jah moon
Mother of creation your night
Women let your heart
Be faithful and true
And when you feast your eyes up in the sky
Let them be blessed by the stars and Jah moon
Mother of creation

We shall walk past this ya darkness
Love is in the stars always sparkling
And this land is ever roots rocking
Eyes above shall be our light yeah
Hold to your faith, keep it in your mind
The light that is hidden is the light that shall shine
Rise up your head, donâ€™t look down and cry
I and I have the sky in sight

I know now, days are passing by
Out of the darkness bring forth true light
Wipe your eye, little lonesome and rise
Lift thine eye to your might
I and I deal with Jah
And donâ€™t expect to be justified by your law
In a mi conscience the fire is burning
It is the confidence thatâ€™s doing the strengthening

Lay your blessed access to I heart
Love goes further than education could be taught
Your inner sense is more than what I lips can chant
Worth is more than anything that they could a stock
Your love is all I need to brighten I lonely night yeah
Sometimes Iâ€™m wrong woman, sometimes youâ€™re right
Ban away all the fussing and the fighting
Replace wicked rejection with blessed uniting
Eyes shall do your brightening yeah
