Beautiful Day

Tom Cochrane

Could it be the joke's on us?
75 degrees and it's just the end of winter
She says we've got all we need
To go outside and sit right down and paint a pictureOne more day to be alive
One more good day to survive
One good day put your glasses onProtect yourself from the mid day sun
It's one more beautiful day
And it's one more beautiful day to surviveDon't forget to put your screen on
No, I don't care if I burn to the ground today
I'm sick and tired of shades of gray and brown
Gonna put this brim hat onJust to be cool
Not as a rule as a hoot
'Cause you're born naked
And you go out with a suit and if you're luckyOne more day to be alive
One more good day to survive
One good day put your glasses onProtect yourself from the mid day sun
It's one more beautiful day
And it's one more beautiful day to surviveI see people in the streets
And they're all smiling
Underneath the ozone skies
We've got one more mountain to climbOne more river to cross
I can't seem to find myself by
Yes, I'm going outside
Let's take a, let's take a rideNo one's gonna break my stride
Or bruise my pride
Or bring me down today
Sick and tired of shades of white and grayShe says we've got all we need
Gonna sit right down over there and paint a picture
You're born naked
And you go out with a suit and if you're luckyOne more day to be alive
One more good day to survive
One good day put your glasses onProtect yourself from the mid day sun
It's one more beautiful day
And it's one more beautiful day to surviveLove you to put your brim hat on Casey
