

What We Do Is Secret

Germes

Standing in the line we're aberrations
Defects in a defect's mirror
We've been here all the time a real fixation
Hidden deep in the furor
What we do is secret, secret! We're influential guys for the D.C.C.
We can lie so perfect
We've got a party line to every call
It's a very short circuit
What we do is secret, secret! Licensed to drill with the torch in our lives
Walking on shallow water
Progressed to the point of no distinction
Dementia of a higher order
What we do is secret, secret!
