

The First Girl On the Moon

Roxette

She was the first girl on the moon
She didn't compromise
When she took off that cold afternoon
Headin' for the northern skies I told her, I could come
That I could come along She was the first girl on the moon
I think, I was her only friend
She brought her ray-gun and old harpoon
Just in case of accidents I told her I could come
That I could come along
(She didn't let me come along)
(Wave goodbye, wave goodbye) She was the first girl on the moon
Standing tall, flag in hand
She looked around, hummin' a tune
The strangest song known to man I told her I could come
That I could come along
(She didn't let me come along)
(Wave goodbye, wave goodbye)
